Professional Summary

React and JavaScript developer with professional experience building and maintaining responsive web applications and modern user interfaces. Experienced with React, REST APIs, Git, and collaborative development workflows.

In addition to my professional experience, I have independently designed and built full-stack MERN applications as personal projects, gaining hands-on experience with Node.js, Express.js, MongoDB, authentication, REST APIs, and deployment.

Technical Skills

- **Frontend:** HTML, CSS, JavaScript (ES6+), React
 - **Backend:** Node.js, Express.js
 - **Databases:** MongoDB, MySQL
 - **Tools:** Git, GitHub, Postman, Figma
 - **Concepts:** REST APIs, Responsive Design, Component-Based Development
-

Professional Experience

Frontend / Web Developer | Orders Offshore | June 2025 – Present

- Build and maintain responsive web applications using React and modern JavaScript.
- Implement features, integrate REST APIs, and improve existing functionality.
- Debug issues, optimize performance, and collaborate with cross-functional teams.

Senior Content & Research Officer / Web Developer | One World (1W) | January 2022 – May 2025

- Managed digital content and website updates across multiple platforms.
- Performed technical improvements and collaborated with internal teams to enhance user experience.

Fleet Supervisor | The Pharaon Logistics | September 2021 – June 2022

Home Service Representative | LibanPost | May 2017 – August 2021

Training & Certifications

Full-Stack Web Development Bootcamp | Codi-Tech | August 2023 – March 2024

Completed a 6-month intensive Full-Stack Web Development bootcamp while employed at One World.

- Built full-stack applications using React, Node.js, Express.js, and MongoDB.
- Developed REST APIs and implemented CRUD functionality.
- Gained practical experience with authentication, database integration, and responsive UI development.
- Worked with Git, Postman, and modern web development workflows.
- Successfully completed the program and received a training completion certificate.

Selected MERN Projects

- **Mini Library Management System (React, Node.js, Express, MongoDB)**
Full-stack MERN application featuring REST APIs and CRUD functionality.
[GitHub](#) | [Live Demo](#)
 - **Event Scheduler (React, Node.js, Express, MongoDB)**
Built scheduling functionality with responsive UI and backend API integration.
[GitHub](#) | [Live Demo](#)
 - **Portfolio Website**
Built with React and Vite. Integrated Google Analytics and Microsoft Clarity.
-

Education

- **Bachelor's degree in Organizational Management** | Matn University College of Technology
- **Diploma in Accounting and Auditing** | Al-Afak Institute
